## OBJECTIVES

Motivated and detail-oriented aspiring web developer with a strong foundation in front-end technologies including HTML, CSS, and JavaScript. Passionate about creating responsive, user-friendly, and visually engaging web applications while continuously improving technical and problem-solving skills. Eager to contribute creativity, adaptability, and dedication to real-world development projects and collaborative environments.

---

## EXPERIENCE

### Front-End Web Developer | 2024 – Present

#### Personal Projects

- I have developed responsive and user-friendly web interfaces using HTML, CSS, and JavaScript through a combination of academic requirements and personal projects. My work focuses on building clean, semantic HTML structures to improve accessibility and SEO, while applying modern CSS techniques such as Flexbox and Grid for responsive layouts.

### Web Design & Development Projects | 2023 – 2024

#### Student Work

- During this period, I worked on multiple school-based web projects where I designed and developed static websites based on given requirements. I focused on structuring content properly using HTML and enhancing visual presentation through CSS styling. I practiced creating responsive layouts and learned how to organize code for readability and maintainability.
-
